Brief Intro

Who we are

The VISION & INNOVATION Club was created in 2014 by a group of students within the National Polytechnic School of Algiers. Since then, the club has been known for its unique vision to help students strengthen their breadths and complete their education process by organizing various activities in many fields, from sessions and debates to conferences and international events.

We are the IT department

We provide a diversity of graphics that represent a visual identity of the club in a positive & creative way. We also provide a technical & artistic support to the communication process during events & activities.

Our vision is to create a professional content that makes the club leader & rival in the IT domain. Provide an atmosphere that allows the members to work, learn & improve their tech-skills.

This Document

This document is a guide or a set of rules that explains the visual elements of our club's identity:

- Logo
- Colors
- Typography...

This set of rules MUST be respected in the first place when making all of the communication media.

Design regulations

- The IT Design Standard must be respected, designs not respecting it are not validated.
- The design must be delivered 4 hours at least before the deadline to allow corrections.
- In case of problems (with PC , design softwares ,Internet...), the designer must inform the head of department IT at least 6 hours before the deadline.
- Social media designs must be delivered only in the forms: JPEG or PNG.
- Logistics designs (printing designs) must be delivered only in the form: PDF.
- Social media designs must be in RGB color mode.
- Logistics designs must be in CMYK color mode.

Design Charter

The icon

Our icon is composed of a light-bulb-like shape with a blue to green gradiant.

The symbol is legible at most sizes, and a small version is provided for micro applications.

The two basic shapes used in the logo: **—a light bulb and an iris—** can NOT be extracted and used as graphic elements.

"V" Vision

"I" Innovation

IRIS Vision

LIGHT BULB Innovation

Our logo

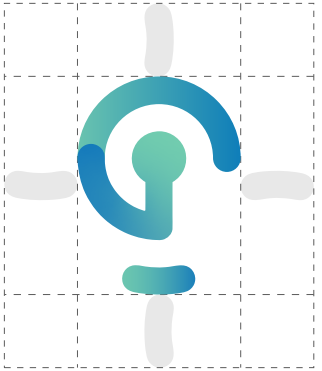

The VIC logo is composed of an icon mixed with a logotype set in Gotham Bold/Light.

The horizontal logo is the primary logo and should be used in most instances.
The stacked logo is for large-scale use. **Avoid using at small sizes**, as it can become illegible.
Always use the logo files provided. Do not re-create.

On certificates and banners, EL-MAARIFA's logo use is a MUST.

EL-MAARIFA SCIENTIFIC ASSOCIATION

EL-MAARIFA SCIENTIFIC ASSOCIATION

Usage on backgrounds

The full-color logos should be used only on white, black back-grounds.

Avoid using full-color logos on photographs unless the logo sits on a black or white area of the image.

Logo misuse

Do not crop the logo

Do not change the opacity of the logo

Do not use another color

Do not distort the logo (عدم التطباز)

Do not use drop shadows or any other effects

Do not change the typeface

Do not outline the logo

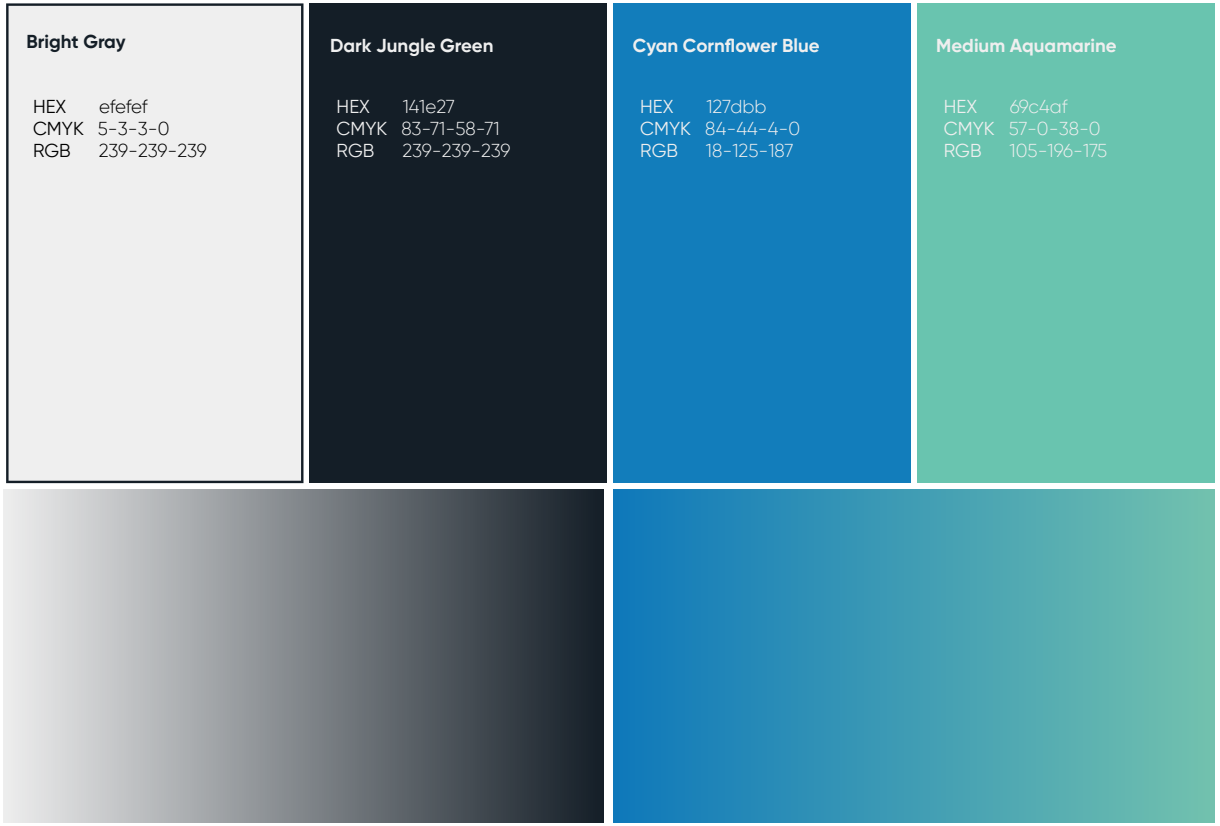

Do not rotate any part of the logo

Core colors

Use these color proportions in any layout or collateral design. Blue, green, white or black can be used as accent colors in the proportions shown on the right.

Use only black or white text on core colors as outlined on the right. Do not interchange the use of black and white text according to preference, as these color combinations are specifically approved for accessibility.

Activity departments

Our activity departments rely on a real brand on their own;

- SPARK's logo is composed of a lightning shape surrounded by electron orbits with a orange to yellow gradiant with a logotype set in Gotham.
- English Bubble's logo has the shape of two letters "E & B" whom represents the first letters of the departement's name with the classic VIC gradiant and a logotype set in Bahnschrift.
- Training's logo is a T-shaped man wearing a graduation hat representing the main goal of the departement with a darker blue gradiant.

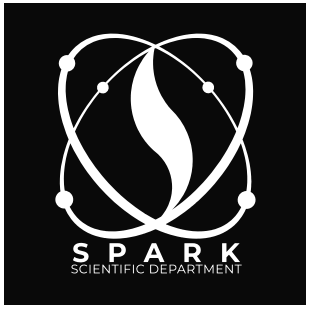

In case of any project that's a activity department related thing, use the logo without the typeface (icon only) in addition of the VIC icon.

In large scales, we use the the stacked logos for each department with adding the VIC stacked logo.
VIC Training has no stacked logo.
For general purposes, we prefer putting the VIC logo on the left side and the act-dep logo on the right side.

The same background guidelines applied in the VIC logo is preferable here.

Activity departments' colors

Typography : Gilroy

VIC typing are set in Gilroy.
Do not set in all caps or all lower-case.

When using Gilroy to create headings on embedded or printed collateral, always typeset it with Bold/Extra Bold.
When using Gilroy to typeset paragraphs, use the Regular/-Medium weights.

On each design, limit yourself with up to 3 maximum weights.
EG: Bold for headings, Medium for paragraphs and Light for attribution.

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp Qq Rr Ss Tt Uu Vv Ww Xx Yy Zz 0123456789

Light	Typografie Maamerkkinä.
Regular	Saturation Pracovitějším.
Medium	Brick quiz whangs jumpy veldt fox.
Bold	**Glib jocks quiz nymph to vex dwarf.**
Extrabold	Požiadavkou Motorického.
Black	Bright vixens jump; dozy fowl quack.

Typography : Gotham

Gotham is only used for the logo typeface.
Bold for “VISION & INNOVATION” and Light for “CLUB”

We can use Gotham on some of SPARK’s designs in particular.

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp Qq Rr Ss Tt Uu Vv Ww Xx Yy Zz 0123456789

Light Typografie Maamerkkinä.
Book Saturation Pracovitějším.
Medium Brick quiz whangs jumpy veldt fox.
Bold Glib jocks quiz nymph to vex dwarf.

Typography : Madani

Madani is our brand's font for Arabic typed purposes.
Font size is 15% bigger than Latin.
In general, Arabic letters tend to be smaller than Roman letters even when set at the same font size.

بسم الله الرحمان الرحيم
أاء بب تت ثث جج حح خخ دد ذذ رر زز
سس شش صص ضض عع غغ فف قق
كك لل مم نن هه وو يي

Light	خسائر اللازمة ومطالبة حدة بل.
Medium	**الآخر الحلفاء أن غزو, إجلاء وتنامت عدد مع**
SemiBold	**هذه ما طرفاً عالمية استسلام**
Bold	**قصف المسرح واستمر الإتحاد**
ExtraBold	**ذلك بالفشل ونستون ابتدعها قد**
Black	**التي فهرست واشتدّت أن أسر**

Typography : Additional

We use varriant fonts other than the mentioned before such as:

- Ubuntu Arabic (for non-Latin typescript)
- Bahnschrift (for English Bubble designs)

Ubuntu Arabic:

Regular ابجدهوز

Bold **ابجدهوز**

Bahnschrift:

Regular Abcdef

Bold **Abcdef**

Videography & Photography

All of our videos should be set on 1920p@25 to 30 frames per seconds.

Lower thirds: Designs should be clean and clear. Names should be set in Gilroy Bold and titles in Gilroy Light. and backgrounds set to 80% to 90% opacity.
Opening Slates: VIC don't use intros in the begining of the videos but we use the "Rotate your phone" if it's tend to be landscape video on IG reels or portrait sizes.
Watermarked logos: Watermarked logos should be placed in the upper left at 50% opacity.

Our photoshoots should be in an event-themed frame with a size of 2500x2000px (may be cropped).

Like our brand voice, all photography direction is based on innovational spirit.

Frame

Event Charter

Before every event, a design charter MUST be made, the event can be independent of the club charter except for the socials and logos placement.
This charter defines the elements of all the designs during the event.

It contains:
- Logo (Form & Color).
- Color code.
- Typography (3 fonts at max).
- Elements & Background.

After the charter is made, we can easily make a poster design.
All the following designs MUST be identical and respect the charter.

Event Charter Restrictions

Our main events have some kind of fixed identity ;

Engnieers's GALA must stick to the prestigious theme with the golden color

Ignite & **HourOfCode** are international events, therefore they already have a specific identity that we must stick to it (Ignite with the Red and HOC with the BLUE can not be REPLACABLE)

You can be creative with secoundary colors for example the GALA used in addition of Gold (Red then White then Green)

Team

Photography&Videography

What's P&V Team

The Photography & Videography team oversees all aspects of visual content creation within the club, ranging from capturing memorable moments on the event day to producing professional-quality films.
This dedicated team handles the photography and videography of important events, ensuring that every moment is documented with precision and creativity. Additionally, they offer training sessions for members interested in developing their skills in this domain, fostering growth and expertise within the club.
Their role is crucial in delivering high-quality visual documentation that highlights the club's activities and achievements.

How To Join

The Photography & Videography team welcomes anyone who has prior experience in photography or a genuine interest in the field, combined with a strong desire to learn and grow. While the team is open to all members of the club, it is primarily composed of individuals from the IT department. It is because the role often involves video editing and content creation, which require specialized skills typically associated with IT expertise. However, the team values diversity and encourages participation from anyone with enthusiasm and creativity.
To join this team, members must fill out an application form provided by the Head of the IT department. This ensures that the selection process is streamlined and that the team can identify candidates who are truly passionate about photography and videography. Additionally, members who own a camera or other valuable equipment that can contribute to the team's efforts are given priority during the selection process, as such resources are vital to the team's success. By joining the team, members have the opportunity to enhance their technical and creative skills while contributing to the visual storytelling of the club's activities and events.

Respo P&V Team

The Photography & Videography (P&V) team is guided by a team responsible who is tasked with overseeing all aspects of the team's work. This responsible ensures that the team functions efficiently, maintains high standards, and meets the club's visual documentation needs. His responsibilities include the following:

1. Training Coordination:

- Organizing and overseeing three primary training sessions: photography, videography, and photo editing.
- Ensuring that team members receive the necessary skills and knowledge to excel in their roles.

2. Collaboration with Other Departments:

- Maintaining regular communication with the Heads of IT and COMM to understand and fulfill their P&V-related requirements.
- Aligning the team's activities with the needs of these departments to support the club's overall objectives.

3. Event D-Day Management:

- Selecting team members to handle specific tasks during events, including taking photos, recording videos, and editing content.

4. Concept Evaluation:

- Reviewing and approving video concepts, such as teasers and announcements, to ensure they are feasible and align with the club's vision.

5. Content Availability:

- Ensuring that all required images and footage for events are captured and readily available.
- Maintaining an archive of completed and planned visual content for easy reference.

6. Equipment Management:

- Managing photography and videography materials and ensuring their availability whenever needed.
- Keeping track of equipment usage and maintenance to avoid disruptions during events.

7. Comprehensive Communication:

- Staying informed about all planned and completed photoshoots and videography projects.
- Collaborating with Project Managers (PMs), other team leaders, and the committee to identify filming needs and ensure the team's presence during shoots.

8. Software Requirements:

- Proficiency in using industry-standard software, such as Adobe Lightroom (or Capture One), Adobe Premiere Pro (or DaVinci Resolve), Adobe Illustrator, and Adobe Photoshop. These tools must be installed and readily available on the leader's PC to support the team's activities effectively.

9. Drive Management:

- Overseeing the P&V team's shared drive, ensuring it is organized and accessible to team members for storing and retrieving visual content.
- By fulfilling these responsibilities, the P&V team leader ensures the team operates efficiently, produces high-quality content, and effectively supports the club's events and initiatives.

Trainings

As mentioned previously, the training program covers three key areas: Photography, Videography, and Photo Editing.

Photography:

- The photography segment covers essential aspects such as different types of cameras, the distinction between JPG and RAW formats, and the fundamentals of the exposure triangle (ISO, shutter speed, and aperture). Understanding these components is crucial for capturing high-quality images.

- The training delves into the various types of lenses and their unique purposes, as well as important principles of framing, including composition laws like the rule of thirds and leading lines, which are critical for creating visually compelling shots.

- As the famous saying goes, "The more you practice, the better you get, the more freedom you have to create." This highlights the importance of hands-on practice for mastering photography. During the training sessions, participants are encouraged to practice holding the camera properly, familiarize themselves with its various buttons and settings, and experiment with different techniques to gain confidence in their ability to capture high-quality images.

Videography:

- In the videography segment, members will explore the significance of frame rates (FPS) and their impact on video quality, as well as the concept of motion blur and how it can influence the final look of a video.

- The training also covers a variety of camera shots, angles, and movements, emphasizing the importance of each in conveying a story or emotion through film.

- Additionally, members will learn how to properly calibrate and operate a gimbal to achieve smooth, professional-level footage. Lighting techniques are also a key focus, as lighting plays an essential role in video production, helping to set the mood, highlight subjects, and create visually appealing scenes.

Photo Editing:

- The photo editing segment will equip members with the skills to use powerful software tools such as Adobe Lightroom Classic. Through this, they will learn how to enhance their images, adjust exposure, color balance, and apply various effects to achieve a polished, professional result. Familiarity with Lightroom's extensive suite of tools will be critical for fine-tuning photos.

- Additionally, participants will be introduced to Capture One, an alternative editing software that offers unique features for photographers looking to refine their editing process.

- Mastering these tools will allow members to take their photography to the next level by transforming raw images into stunning visual masterpieces.

Materials

Current Equipment:
As of now, our equipment lineup includes a variety of cameras, lenses, microphones, tripods, and a gimbal, which will serve as the foundation for our work:

Cameras & Lenses:

- Canon 6D
- Canon 80D
- Canon EF 24-105mm f/4.0 L USM
- Canon EF 50mm f/1.4 USM

Microphones: Hollyland Lark M1
Tripods: 2 Tripods
Gimbal: DJI Ronin S

While having a wide range of equipment can certainly contribute to more professional outcomes, it is important to understand that the quantity of equipment doesn't necessarily guarantee higher quality. The person in charge should prioritize acquiring the essential tools based on the specific needs of each project. Having the right equipment is far more important than having a large collection of gear that may not be immediately necessary.

HOLLYLAND

FARI9 TI9NI

is the team responsible for managing all IT, communication, and P&V activities during D-Day events. It ensures that event moments are captured, edited, and shared in real time, with smooth coordination and efficient execution.

Responsibilities:

- Full event coverage through photos, videos, and stories, ensuring all important moments are captured.
- D-day editing of photos and videos to publish content on the same day and maintain audience engagement.

Technical Team Members:

- IT & COMM Head of Departments (HoDs).
- P&V Responsible
- TikTok Responsible
- IT & COMM Responsibles
- Photographers, videographers, editors, COMMers and tiktokers.

Work Plan:

Before The D-Day:

- Pre-event meeting and role assignment.
- Define content waves and posting schedule.
- Check equipment and prepare the technical workspace.

During The D-Day:

- The PV Responsible supervises the overall workflow.
- Photographers & Videographers cover the event and provide selected photos & videos to be published.
- Editors edit the photos and add the event branding.
- COMM publishes the prepared content with the corresponding captions.

After The D-Day:

- Upload and organize all photos, videos, and digital assets in the **Drive**.
